

SOUND TRACK

Designed to promote soundness and user confidence

Equestrian Surfaces is passionate about remaining at the forefront of product innovation and business development, and Sound Track is our most recently-developed surface.

With the design influenced by three years of in-depth research alongside gait analysis expert Russel Guire from Centaur Biomechanics, Sound Track is comprised of two grades of silica sand blended with synthetic stabilising fibres, and is reliable for supporting fast movement and providing security in turns.

Sound Track's elite provision of comfort, shock absorbance, support and energy return has led to the surface becoming renowned for promoting soundness in horses.

Benefits

- Suitable for all disciplines
- Suited to indoor and outdoor use
- Recently developed to promote soundness and provide cushioning and stability
- Ideal for private professionals and yards of up to 40 horses
- Popular with competition centres, RDA riders and colleges
- Consistent, safe and reliable
- Requires minimal maintenance

Tried & Tested...

Firmly endorsed by Kingswood Equestrian, Moody Dressage, Simon Constable Vets, Hughes Dressage and Astrid Bolton Sport Horses, our Sound Track surface helps to prevent lower-limb injuries and has been designed with the welfare of your horse in mind.
