

EVENTING

Dynamic and adaptable surfaces which can accommodate the requirements of multiple disciplines.

WE RECOMMEND

1. **Cushion Track Classic**
2. **Premier Track**
3. **Sand and Synthetic Fibre**

Accommodating a combination of multiple disciplines, a surface that is used for eventing purposes needs to be dynamic and adaptable.

With the surface being opened up and riding slightly deeper for dressage, and then made tighter and firmer to provide the correct support for jumping, it also needs to be durable enough to withstand more regular harrowing to vary the conditions for the ranging demands of the eventing discipline.

Our surfaces are known globally for providing excellent traction, cushioning, grip, energy return and support, promoting soundness in horse and rider and providing consistency in performance.

“

Our new surface performs very well in all weather conditions and all our horses feel amazing on it, giving confidence to young horses just finding their balance, all the way up to top international horses.

Mike Winter

Benefits of our surfaces

- ✔ **Dynamic and adaptable surfaces to provide support in multi-discipline sports**
- ✔ **Durable surface options**
- ✔ **Waxed and non-waxed surface options**
- ✔ **Consistent footing for training and competition**
- ✔ **Suitable for indoor and outdoor applications**
- ✔ **Reducing the risk of injury, increasing confidence, and promoting soundness in horse and rider**

“

Equestrian Surfaces supplied us with their unmixed sand and synthetic fibres, and we are still delighted with the surface, as it continues to perform very well and is super to jump on!
