GREEN AWARD

Our green initiatives have been at the forefront of our development plans for some time now, and we've been making significant investments into incorporating practices which will boost our sustainability and reduce our carbon footprint.

EQUESTRIAN EXPERTS

Since 1984

At Equestrian Surfaces Ltd we take a great deal of pride not only in the quality of our products, but also in the quality of the service we strive to provide.

With over 35 years of trade experience, we have undertaken work worldwide for a variety of clients, including the late Queen Elizabeth II.

Our equestrian surfaces are manufactured with the use of state-of-the-art equipment and technology to comply with all relevant safety regulations to the highest standards.

Our experienced manufacturing and construction teams are passionate about delivering an excellent level of service, including providing an aftercare service which has been highly rated by customers.

Whether your project involves the refurbishment of an existing arena or surface, or the construction of an entirely new arena or equestrian facility, you can rest assured that all work will be carried out with accuracy and efficiency.

We are pleased to have gained **ISO UKAS Accredited 9001** status for the manufacture, supply and installation of all-weather riding surfaces for equestrian use. Achieving this accreditation means that our products and services have met the requirements for surface manufacture within the industry, **guaranteeing the best quality of surface** for our customers.

We aim to provide long-lasting surfaces that are fit for purpose. With longevity in mind, we advise customers to consider all available options before making a final decision. Our experienced team are always on hand to answer any queries you may have. If you have any questions about your surfacing requirements, please give the office a call and we will be more than happy to assist you.

WHAT WE OFFER

Services tailored to your needs

Manufacture

Utilising state-of-the-art technology and top-of-the-range equipment, Equestrian Surfaces has always striven to remain at the forefront of the industry when it comes to product innovation and business development.

Known for the quality and range of products that we offer, all of our surfaces are manufactured in-house in the UK.

Every grain of sand and thread of fibre that forms the content of each surface is meticulously monitored by computers, allowing us to be confident in guaranteeing consistency in the quality of all of our products.

- 7 surface options available
- Suitable for all disciplines and all-weather use
- ISO UKAS Accredited
- Made in Britain
- Proven performance – tried and tested worldwide

Find out more on Page 22

Supply

From Equestrian Surfaces you can expect a tailored service suited to your needs.

All of our riding surfaces can be purchased on a supply-only basis, allowing you the freedom to manage your own project with your own equipment and selected team of construction and installation staff. If you prefer, you can also arrange your own haulage service to collect your materials from our UK warehouse.

- Complete freedom over the logistics of your project
- Able to supply anywhere in the world
- Delivered straight to your site, or collect from our UK warehouse

Find out more on Page 25

Installation

If your project involves the refurbishment of an existing arena or surface for renewed performance, our dedicated installation teams are on hand to ensure every stage of the process goes smoothly. Whether you'd like to fit an entirely new surface or simply "top-up" your existing surface with our highly-rated blend of sand and fibres, we can guarantee you will feel and notice a difference straight away.

- Replace or refurbish your surface for renewed performance
- Expert installation team
- Keep riders and horses happy

Find out more on Page 26

Planning

If your ambition is to construct an entirely new arena or equestrian facility, there are several factors you will need to consider.

At Equestrian Surfaces, we offer a turnkey approach for every project.

Including a comprehensive planning and design service, our turnkey approach sees every stage of your project, from conception to completion (and beyond), managed by our enthusiastic team of experienced professionals.

Our planning and design service is offered by chartered architects and planning specialists who have a high success rate of gaining planning permissions for a wide range of projects.

- Assistance with gaining planning permissions, with a high rate of successful applicants
- Expert advice and trusted guidance
- Chartered architects to design your new arena

Find out more on Page 27

Construction

With over 35 years of industry experience, Equestrian Surfaces employ expert teams of skilled engineers and construction staff who are dedicated to completing your project to the highest possible standard.

Having achieved a vast portfolio containing over 10,000 finished projects and undertaken work on both indoor and outdoor arenas, when using our team of specialists you can rest assured that all work will be carried out with accuracy and efficiency.

- **Highly-skilled and experienced construction staff, specialists in their field**
- **Dedicated to achieving the best results**
- **Constructing your arena with accuracy and efficiency**
- **A level of workmanship that remains unmatched**

Find out more on Page 28

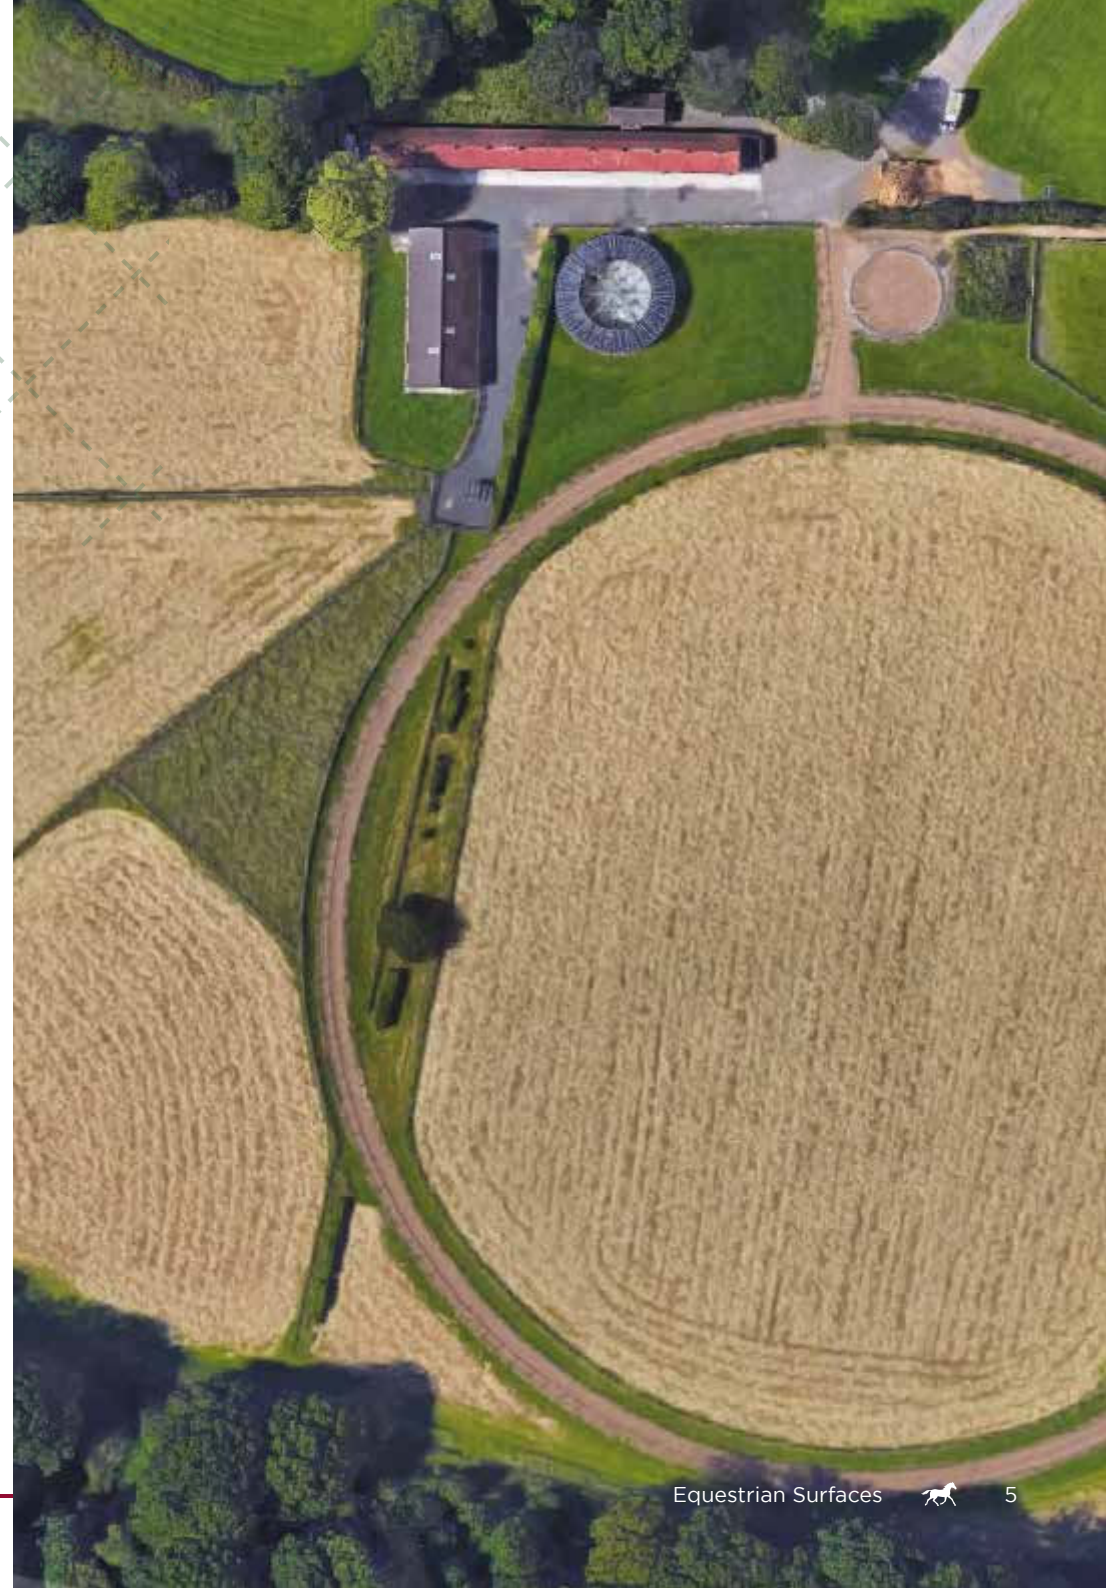

Maintenance

At Equestrian Surfaces, we have the capacity to manage every stage of your project, from planning through to completion, and beyond.

To keep your surface performing at its best, it's important to commit to a regular maintenance schedule and ensure that your surface is being swept clean of debris and watered when necessary.

- **Lifting/re-laying your surface, harrowing/aerating your surface, and re-levelling**
- **Increase the lifespan of your surface, and maintain its performance**

THE SURFACE RANGE

Quality synthetic surfaces for all disciplines

The range offered by Equestrian Surfaces features seven synthetic surface options suitable for indoor and outdoor use in all weathers, for all disciplines.

Proud to have gained ISO UKAS 9001 accreditation, Equestrian Surfaces remains to be an industry leader in the manufacture, supply and installation of all-weather riding surfaces for equestrian use.

With a number of waxed and non-waxed options available, it isn't always easy to determine which surface is the right one for you.

Our team strive to provide the highest level of customer service, and will be more than happy to provide you with sound advice and guidance throughout the planning and construction process.

The perfect surface for you will be dependent upon a number of factors, including budget, purpose, and regularity of use. You can

read overviews of each of our surfaces in the following pages. However, should you require more information, the Equestrian Surfaces team will be able to provide reliable recommendations after establishing your specific circumstances and needs.

Our waxed surfaces are designed to be hard-wearing and durable, yet also provide superb support, good cushioning and exceptional energy return to keep your horse performing at optimum.

The waxed surface range features surfaces that are suitable for professional training centres, competition grounds and race tracks, as well as a selection that are suitable for leisure pursuits and private use.

The non-waxed surfaces in our range provide a low-cost alternative, yet do not compromise on quality or performance.

Explore our surface range...

CUSHION TRACK™ PREMIER

Our world-class racing and competition surface

CUSHION TRACK™ CLASSIC

The original waxed surface offering top-quality results for all disciplines

SOUND TRACK

Designed to promote soundness and user confidence

WAX TRACK

The affordable waxed surface for private or professional use

PREMIER TRACK+

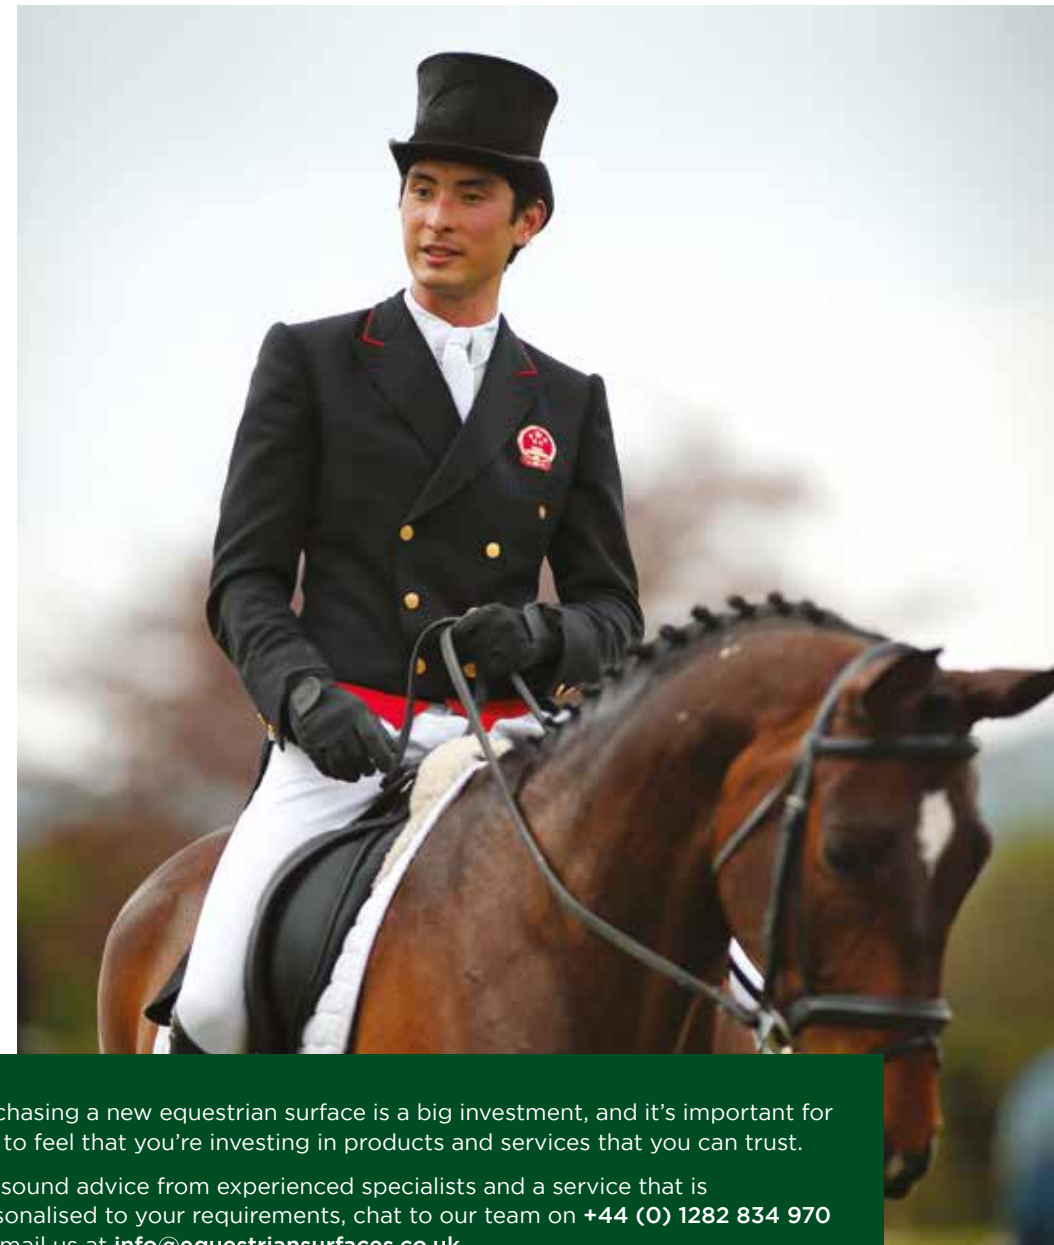

A high-grade surface teamed with our Ebb & Flow drainage system

PREMIER TRACK

A pre-blended, non-waxed surface guaranteeing consistent quality

ECONOMY TRACK

Our cost-effective and environmentally-friendly option for improved stability

Purchasing a new equestrian surface is a big investment, and it's important for you to feel that you're investing in products and services that you can trust.

For sound advice from experienced specialists and a service that is personalised to your requirements, chat to our team on **+44 (0) 1282 834 970** or email us at info@equestriansurfaces.co.uk.

“We use Equestrian Surfaces for both our indoor and outdoor arenas; I can honestly say the quality of the product is second to none, it definitely improves the quality, confidence and movement of our horses.”

– Rebecca and Gareth Hughes

CUSHION TRACK™ PREMIER

Our world-class racing and competition surface

Benefits

- Suitable for all disciplines
- Suited to indoor and outdoor use
- Designed for very heavy footfall
- Ideal for racing tracks and competition centres
- Premium, top-of-the-range surface
- High-performance, providing cushioning and support

Overview

Cushion Track™ Premier is our premium equestrian surface, designed for use in racing and competition centres.

Constructed with a unique blend of multi-washed silica sand and environmentally-friendly synthetic fibres, our Cushion Track™ Premier is highly durable and designed to withstand continual daily use and very heavy footfall, in all weathers. As a waxed surface, it requires minimal maintenance, making it the stand-out choice for businesses and professional riding grounds.

Providing excellent cushioning and high levels of shock absorption, the Cushion Track™ Premier supports freedom of movement and provides security for turns at high speed.

Tried & tested...

Cushion Track™ Premier has been installed in a number of venues across the UK, including Arena UK, Addington Manor, Chard Equestrian, Ingliston Equestrian and Vale View Equestrian. It is also the surface chosen for the annual Alexander's SCOPE Showjumping festival.

Cushion Track™ Premier is used and loved by many equestrian professionals, including Mary King MBE, Michael Whittaker, Douglas Duffin and Eilberg Dressage.

CUSHION TRACK™ CLASSIC

The original waxed surface offering top-quality results for all disciplines

Benefits

- Suitable for all disciplines
- Suited to indoor and outdoor use
- Requires minimal maintenance
- High-quality, providing support, stability and cushioning
- Designed for high-level use and heavy footfall

Overview

Like our Cushion Track™ Premier, our Cushion Track™ Classic has been developed to support the needs of horses and riders of all disciplines.

With a slightly lower wax content, this surface is still highly durable and able to withstand daily use and heavy footfall without compromising on performance.

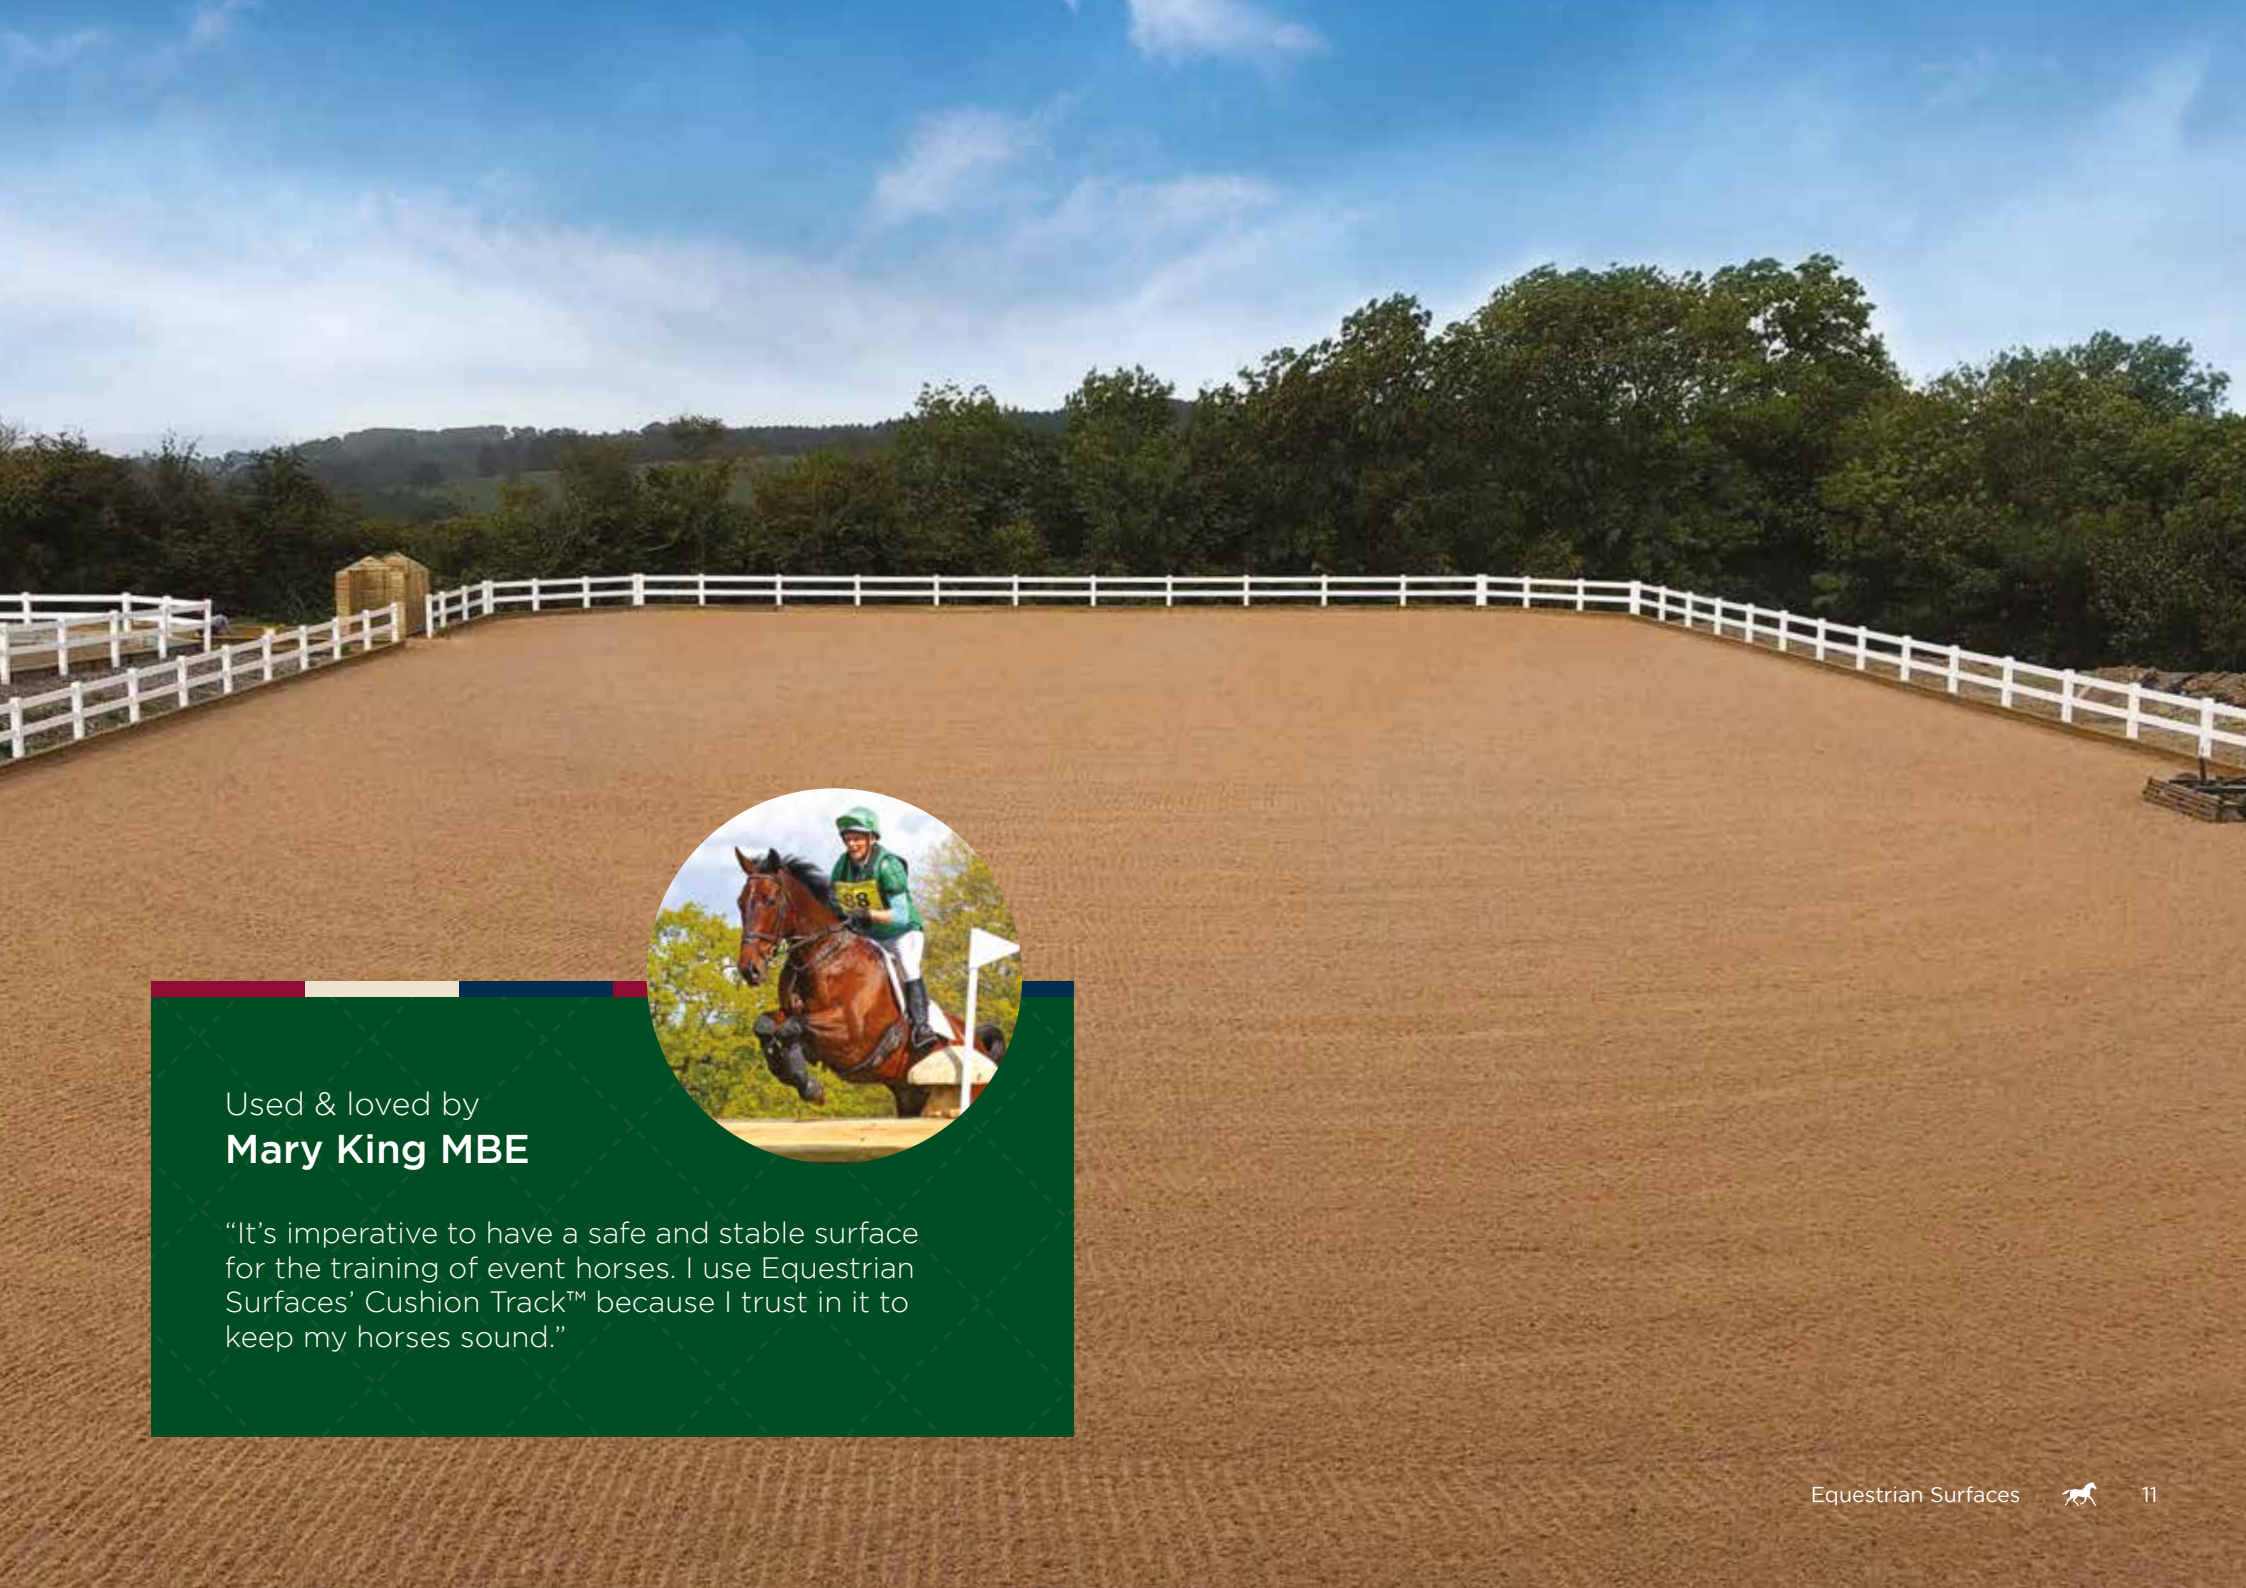

If your livelihood depends upon your arena, we know how important it is that it remains accessible and safe to use all year, in all weathers.

Cushion Track™ Classic supports riders no matter the weather conditions, providing you with a surface that you can rely on.

Tried & tested...

Cushion Track™ Classic is installed in professional centres such as Moulton College, Howe Equestrian and Hunters Equestrian, and is used and loved by Hughes Dressage, Moody Dressage, Ron Brady, AM Dressage and Dumas Eventing.

Used & loved by
Mary King MBE

"It's imperative to have a safe and stable surface for the training of event horses. I use Equestrian Surfaces' Cushion Track™ because I trust in it to keep my horses sound."

“We are very pleased with the surface you installed and supplied. It needs the absolute minimum of maintenance and rides beautifully in all conditions and provides the perfect footing for the training of dressage horses.”

– Georges Dewez, Carreg Dressage

SOUND TRACK

Designed to promote soundness and user confidence

Benefits

- Suitable for all disciplines
- Suited to indoor and outdoor use
- Recently developed to promote soundness and provide cushioning and stability
- Ideal for private professionals and yards of up to 40 horses
- Popular with competition centres, RDA riders and colleges
- Consistent, safe and reliable
- Requires minimal maintenance

Overview

Equestrian Surfaces is passionate about remaining at the forefront of product innovation and business development, and Sound Track is our most recently-developed surface.

With the design influenced by three years of in-depth research alongside gait analysis expert Russel Guire from Centaur Biomechanics, Sound Track is comprised of two grades of silica sand blended with synthetic stabilising fibres, and is reliable for supporting fast movement and providing security in turns.

Sound Track's elite provision of comfort, shock absorbance, support and energy return has led to the surface becoming renowned for promoting soundness in horses.

Tried & tested...

Firmly endorsed by Kingswood Equestrian, Moody Dressage, Simon Constable Vets, Hughes Dressage and Astrid Bolton Sport Horses, our Sound Track surface helps to prevent lower-limb injuries and has been designed with the welfare of your horse in mind.

WAX TRACK

The affordable waxed surface for private or professional use

Benefits

- Suitable for all disciplines
- Suited to indoor and outdoor use
- Requires minimal maintenance
- Ideal for light use and small livery yards of up to 12 horses
- Affordable, quality surface with low wax content

Overview

With the lowest wax content in the range, our Wax Track consists of a unique blend of washed silica sand and stabilising fibres and is relied upon by private professionals across the UK.

Requiring minimal maintenance, the Wax Track surface is able to perform all year, allowing horses to work well in all weathers so that you never have to miss a day of riding.

Offering consistency and quality, the Wax Track is the perfect surface for smaller yards of up to twelve horses.

“I had ridden on surfaces supplied by Equestrian Surfaces at a number of competitions, and had always noticed the improved level of support their surfaces offered. The project ran smoothly, and we ended up with an excellent surface which offers no trouble even in the worst weather conditions.”

– Alex Limes, Bullens Farm

PREMIER TRACK+

A high-grade surface teamed with our Ebb & Flow drainage system

Benefits

- Suitable for all disciplines
- Suited to indoor and outdoor use
- Ideal for larger, high-level competition centres and training or racing facilities
- Non-waxed, all-weather track laid over a sophisticated drainage system

Overview

Our high-performance Premier Track+ has been developed with consistency, stability and ease of maintenance in mind.

Best suited to larger arenas which are subjected to heavier footfall, the Premier Track+ consists of two key elements. The surface itself is a unique blend of high-grade silica sand mixed with polypropylene synthetic stabilising fibres, providing an excellent level of bounce, shock absorption and energy return to keep horses healthy and prevent lower-limb injuries. Underneath the surface, an Ebb & Flow drainage system is installed, which automatically maintains the level of surface moisture, eliminating the need for above-ground watering systems.

With constant moisture control afforded by the underground system, the surface is unlikely to become dusty, and the elasticity, created through the capillary action of the sand, will be maintained more accurately than would be achieved with manual watering.

Tried & tested...

The Ebb & Flow system is popular with large equestrian facilities, such as the new British Showjumping National Training Centre and the David Broome Event Centre, who have praised it for the ease of maintenance it provides and the consistent surface quality.

PREMIER TRACK

A pre-blended, non-waxed surface guaranteeing consistent quality

Benefits

- Suitable for all disciplines
- Suited to indoor and outdoor use
- Increased stability and excellent water retention
- Pre-blended at our warehouse for simple installation and guaranteed consistency
- Ideal for those with damp/wet climates
- Excellent value, without compromising on quality or performance

Overview

Our Premier Track is an ideal option for those with small to medium sized yards who are looking for a new track that is cost-effective, without having to compromise on quality or performance.

Pre-blended in our warehouse, the Premier Track arrives on site perfectly mixed and ready to be installed by our team. Purchasing your track pre-mixed, as opposed to purchasing the loose components, ensures the ratio of sand to fibre is precisely balanced and evenly distributed throughout the surface.

The Premier Track is a dry, non-waxed surface which will require regular irrigation, particularly in dry periods, to maintain its condition and performance.

Used & loved by
Mike Winter

“Our new surface performs very well in all weather conditions and all our horses feel amazing on it, giving confidence to young horses just finding their balance, all the way up to top international horses.”

ECONOMY TRACK

Our cost-effective and environmentally-friendly option for improved stability

Benefits

- Suitable for all disciplines
- Suited to indoor and outdoor use
- A low-cost option that offers top-quality results
- Ideal as a 'top-up' to an existing surface, for renewed performance

Overview

Economy Track provides a low-cost alternative to our more premium tracks and allows you to save on the overall cost of your project whilst still providing an excellent riding surface.

Our synthetic fibre and sand blend is of the finest quality, ensuring excellent footing for riders. This option is perfect for those looking for an economical solution for their equestrian project without compromising on quality.

Depending on your needs, you can choose from premixed or unmixed - although it is worth mentioning that opting for unmixed will mean you need to do this yourself.

MANUFACTURE

Made in Britain, supplied worldwide

At Equestrian Surfaces, we have always valued innovation and striven to remain at the forefront of the industry. In our 35 years of business, our product range has developed over time alongside the needs of horses and riders of all disciplines, and our passion for product innovation and development has made an impact on the surface industry.

Renowned across the world for both the range and the quality of the products on offer, we are the only company to manufacture our own equestrian surfaces in-house in the UK, with the capacity to ship and install worldwide.

Dedicated to maintaining consistency throughout all of our surfaces, we have invested in top-of-the-range computer systems which guarantee the highest degree of accuracy in the manufacturing process. Every grain of sand and thread of fibre that forms the content of each surface is meticulously monitored, offering very

little room for variance or error and enabling us to have complete control over the content and quality of the final product.

Equestrian Surfaces Ltd is proud to have gained ISO UKAS Accredited 9001 status for the manufacture, supply and installation of all-weather riding surfaces for equestrian use. Achieving this accreditation means that our products and services have met the requirements for surface manufacture within the industry, guaranteeing the best quality of surface for our customers.

- 7 surface options available
- Suitable for all disciplines and all-weather use
- ISO UKAS Accredited
- Made in Britain
- Proven performance – tried and tested worldwide

Should you prefer for your project to be supplied, managed and completed by the same company, Equestrian Surfaces also offers a **turn-key approach to all projects**, allowing you the peace of mind that every stage and element of the process is in the hands of **experienced specialists you can trust**.

SUPPLY

Supplied by us, allowing you the freedom to manage the rest of your project

From Equestrian Surfaces, you can expect a tailored service suited to your needs, preferences and budget.

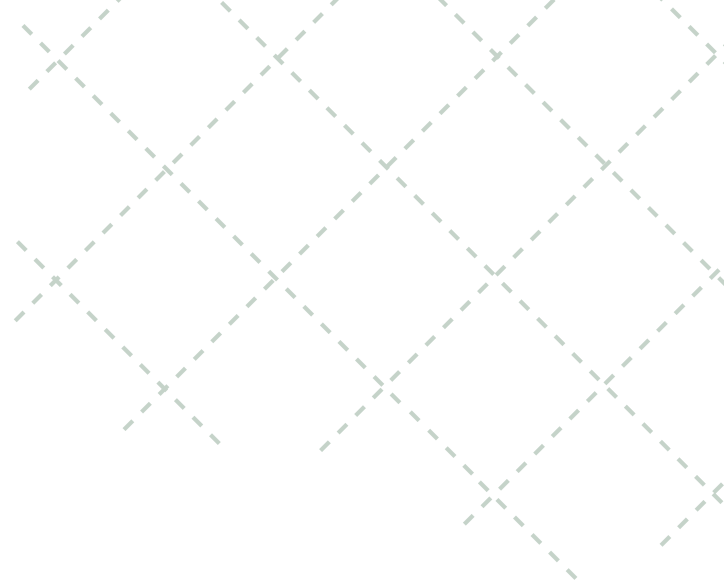

All of our riding surfaces can be purchased on a supply-only basis, allowing you the freedom to manage your project in your own way. We have years of experience with working alongside independent contractors and will always be flexible where we can to help your project glide through to completion with as little hassle as possible.

We like to offer customers complete freedom over the logistics of their project. With this in mind, you can opt to have your materials delivered straight to your site, or you are welcome to arrange your own haulage service to collect your materials from our UK warehouse.

We also offer worldwide shipping at competitive prices. Get in touch today for a quote.

- Complete freedom over the logistics of your project
- Able to supply anywhere in the world
- Delivered straight to your site, or collect from our UK warehouse

For further information on how Equestrian Surfaces can help with your project, call **+44 (0) 1282 834 970** or email info@equestriansurfaces.co.uk.

INSTALLATION

Dedicated installation teams with decades of experience

If your project involves the refurbishment of an existing arena or surface for renewed performance, our teams are on hand to ensure every stage of the process goes smoothly.

Whether you'd like to fit a brand new surface or simply 'top-up' your existing surface with our highly-rated blend of silica sand and fibres, we can guarantee you will feel and notice a difference straight away.

With a vast portfolio of clients from around the globe, the installation teams at Equestrian Surfaces are both highly skilled and extremely professional, carrying out all work with accuracy and efficiency to the highest degree.

Speak to a member of staff today to find out more about how we can help with the replacement or refurbishment of your equestrian surface.

- Replace or refurbish your surface for renewed performance
- Expert installation team
- Keep riders happy and horses healthy

At Equestrian Surfaces, we employ dedicated installation and construction teams who are **specialists in their field**, with the capabilities to undertake the replacement of an existing surface or the construction of an entirely new equestrian facility, arena or gallop.

PLANNING

Expert advice for planning, managing and completing your project

Equestrian Surfaces offer a turn-key approach to every project, which includes a comprehensive planning and design service.

All design work is carried out by chartered architects and our planning service is provided by specialists who hold a very high success rate of gaining necessary permissions and having plans approved.

Equestrian Surfaces and partnering companies can provide you with:

- Advice on how to maximise your chances of obtaining planning approval
- A site-specific planning appraisal
- Site visit(s) to access key planning constraints
- Preparation of a detailed planning application, including visual elements
- Help with submitting your application
- Planning officer liaison
- Regular updates on the status of your application
- Discharge of planning conditions

For further information on how Equestrian Surfaces can help with your project, call **+44 (0) 1282 834 970** or email **info@equestriansurfaces.co.uk**.

CONSTRUCTION

Experienced, specialist construction teams that you can trust

With over 35 years of industry experience, Equestrian Surfaces employs trusted teams of skilled engineers and construction staff who are dedicated to completing your project to the highest possible standard.

The construction of a specialist facility requires the application of specialist expertise and know-how. With the correct machinery and mastered methods of expediting your project as quickly as possible, our engineers have completed thousands of projects around the world and are committed to constructing your new arena with accuracy and efficiency.

- Highly-skilled and experienced construction staff, specialists in their field
- Dedicated to achieving the best results
- Constructing your arena with accuracy and efficiency
- A level of workmanship that remains unmatched

Stage 1

Our teams will break ground at the site, removing the turf before installing the drainage system.

Stage 2

The fencing will then be concreted into the ground and the surface membrane will be installed over the drainage system.

Cushion Track™ Classic

Stage 3

Once everything is perfectly level, your new surface is installed. Happy riding!

There are three options for the base of your arena...

1. The traditional stone base

The traditional base is the most widely-used option. Consisting of a fully perforated drainage pipe system, a stone blanket with separation membranes is then laid on top before the riding surface is installed.

2. Stone and grid system

The stone and grid system is mainly used in the construction of temporary arenas, such as for competition sites or for those waiting on planning permissions to be passed. The stone and grid system can also be used over a stone drainage blanket for turnouts and lunge pens to replace the use of a membrane. Being more robust in nature, the stone and grid system won't be damaged by digging in a turnout.

3. Ebb & Flow system

The Ebb & Flow system is a specialised under-surface watering system which eliminates the need for above-ground watering, making surface maintenance more straightforward.

MAINTENANCE

Continued quality, consistency and performance

At Equestrian Surfaces, we have the capacity to manage every stage of your project, from planning through to completion, and beyond.

To keep your surface performing at its best, it's important to commit to a regular maintenance schedule and ensure that your surface is being swept clean of debris and watered when necessary.

We carry out all maintenance work on behalf of the client as part of our service, allowing you to rest assured that your surface is being monitored and managed by experienced professionals on a regular basis.

The method and frequency of the maintenance work you should adopt will be dependent upon a number of factors, including the type of surface you have (i.e. waxed or non-waxed), the purpose and regularity of use, and whether it's an indoor or an outdoor surface.

- **Lifting/re-laying your surface, harrowing/aerating your surface, and re-levelling**
- **Increase the lifespan of your surface, and maintain its performance**

FINANCE OPTIONS

In partnership with Portman

Do it with finance, do it with Portman.

We offer a personal and professional service. There's no complex call centre or different departments to deal with, your dedicated Account Manager will understand your needs then guide you through the process, preparing documentation and finance proposals so you don't have to, then they'll find the right deal for you.

Speak to a member of our team to find out more.

- Get what you need now
- Affordable monthly payments
- Fixed interest rates
- Spread the cost
