

SHOWJUMPING

Responsive surfaces providing a consistent footing and security in jumps.

WE RECOMMEND

1. **Cushion Track Premier**
2. **Cushion Track Classic**
3. **Premier Track+**

Horses, along with their riders, need to be completely confident in their footing in order to perform well when jumping, and the best way to ensure confidence is to work on a surface well-suited to the discipline.

The ideal showjumping surface needs to be firm yet responsive, providing a secure footing to allow the horse to push off well behind the jump and land safely, limiting the risk of concussion upon landing by ensuring it doesn't rut.

Stable and supportive with good cushioning and traction, our surfaces have been designed in such a way to ensure optimised levels of impact absorption and energy distribution, thereby reducing the risk of injury and damage to ligaments, straining or unnecessary fatigue.

Benefits of our surfaces

- ✔ Firm and responsive, providing security on take off and landing
- ✔ Superior impact absorption and energy distribution for reduced risk of injury or fatigue
- ✔ Durable surface options, perfect for competition centres or sites with heavy footfall
- ✔ Consistent footing for training and competition
- ✔ Suitable for indoor and outdoor applications
- ✔ Waxed and non-waxed surface options

Surface is such an important factor in how horse's perform. I'm very thankful to the team at Equestrian Surfaces who kept the ground impeccable at Liverpool International Horse Show.

As a rider it really does give you peace of mind that the surface is of such high quality, particularly when our horse's wellbeing is our utmost priority.

Grace Wallace, Competitor at Liverpool International Horse Show 2019
